

What does family responsibilities mean?

To have the spouse or a son, by nature or adoption under 26 years of age or disabled, or foster child, who has no income above 75% of the Minimum Interprofessional Salary (SMI) per month and the sum of all income, divided by the number of members that make up the family unit, does not exceed that amount.

What income is taken into account?

Your gross income and the gross income of your family members (including your common-law spouse if there are children of the couple aged under 26 or with disabilities, or minors under the foster care of both of you, who form part of the household), whatever its origin, except for legal compensation for the termination of a contract and Social Security assignments per child in your care.

Also 3,0% of the value of non-income-generating assets, not including your main residence.

No expenses incurred by you or the members of your family unit can be deducted from the income.
